

# Psychical Research: The Science of the Super-Normal (Perspectives in Psychical Research)

This book marks a distinction between psychical research, on the one hand, and spiritualism, on the other. The two terms are often regarded as synonymous, but they are not. Psychical research aims at being a science, while spiritualism or spiritism is a pronouncement of faith. Contents: Part I: Method in Psychical Research: possibility of deception in psychical research, forms of possible deception, higher problems of psychical research; Part II: Theories of Psychical Research: concept of theory and its methodology, parapsychical phenomena, parapsychical phenomena.
