

Big Bang Creativity: Get your mind exploded to create a new universe

Fundamentally, our normal mind is full of logical circuits, emotional bonds, and time & place-related restrictions that compel us to think in some customary ways in order to make limited thoughts. We are unable to think creatively because we have these obstructing impressions in our brain. The impressions in our brain, called memes, are miscellaneous connections of thoughts-related to logic, rule, education, sensory experiences, profession, language, family, society (culture, religion, and race), place (village, city, district, state, and country), period, gender, human being, and ego. However, Big Bang mind, a liberated mind, can break miscellaneous memes impressed in our mind and allows us to think beyond all sorts of rules, regulations, and restrictions. We need Big Bang mind because we need new ideas to solve a complicated problem, establish a business, invent a new device or a formula, develop our business, or write an exciting fiction. Through this book, learn the secrets of Big Bang mind in order to make money with a number of new revolutionary inventions and get known millions of dollars worth of international contests to test how creative you are
