

The 7 Habits of Highly Creative People

Pick up any book on creativity and the first thing you'll notice is that the author is trying to show you how to be creative. What they don't tell you is that you were born creative; you don't need to be taught that. Instead, you need a way to remove the mental blocks you presently have that are stopping you from being creative. In this book, you will discover the seven habits of highly creative people with case studies showing you how to apply each step of creativity. The seven ways of creating are using (1) your mind, (2) ideas, (3) thinking outside the box, (4) imagination, (5) inspiration, (6) innovation, and (7) vision. You will learn how to awaken your creative genius using the 9 tips that are included. While many people think they are not creative, there are some who are what are called Super-Creative. You are a super-creative if you jump from one creative idea to another and have trouble completing any. In this book, you'll find the 12 Tips for controlling your super-creative genius.
