

Take The For Better Quiz #3: Defining Your Love Style. One of the New York Times most popular journalists presents groundbreaking scientific news about marriage. And, surprise: Its good news. Weve all heard the statistic: Fifty percent of marriages end in divorce. Its enough to make many couples give up when the going gets rough, thinking thats what everybody else does. But what if it werent true? What if, in fact, its not only possible but often easier than you think to save a seemingly troubled relationship? These are the questions Tara Parker-Pope asked herself after her own divorce. An investigative journalist on the health and wellness beat, she turned to some of the top biologists, neuroscientists, psychologists, and other scientists for the facts about marriage and divorce. Those facts were more positive and provocative than shed ever expected, and For Better offers page after page of astonishing, eye-opening good news. Parker-Pope presents the science behind why some marriages work and others dont; the biology behind why some spouses cheat and others remain faithful; the best diagnostic tools created by the most cutting-edge psychologists to assess the probability of success in getting married, staying married, or remarrying. There are questionnaires to uncover potentially damaging hidden attitudes toward spouses. There are tools to show the impact of routine, fresh activity and how small adjustments can make a huge difference. Tara Parker-Popes genius is for exploring the science behind the big issues that affect our lives every day and translating that science into advice that we can use-every day. For Better is the definitive guide to the most profound relationship of our lives.
