

The reason this novel is was written is because even though we live in a modern society, human beings seem to only believe what they see or experience themselves. To a degree, I agree, seeing is believing I for one had the same philosophy, until I and my family were unfortunate to experience the phenomenon. Therefore I want to share my ghastly experience as we are unenlightened with the unknown. The story is based on my experiences and it is not too influence any one to change their opinion with regards to the unknown. Once you have read the story it could enlightened you to the possibility of the supernatural.
