This book is about seeing how the different elements of the jigsaw puzzle that we call life can be brought together. We all want to enjoy life and find satisfaction and contentment in our days and the things that we decide to do. We have untold wisdom, knowledge and experience, we just need to let this come out to play.

Life is a joint adventure. It is there for us but we have our part to play. The pieces of the puzzle are there for all to see. Why do some of us have trouble putting them together, while others seem to breeze through things? The power of words . . .

Words have power. If you let them they can quietly and gently speak to you. They can move and rejuvenate you. They can uplift you and fill you with thoughts, ideas and perceptions that will surprise you. And all you have to do is to read and let the words flow through you. Words are, of course, the most powerful drug used by mankind.
