

The Roots of the Reformation: Tradition, Emergence and Rupture

Renowned historian G. R. Evans revisits the question of what happened at the Reformation. Contravening traditional paradigms of interpretation, Evans charts the controversies and challenges that roiled the era of the Reformation and argues that these are really part of a much longer history of discussion and disputation. Evans takes up several issues, such as Scripture, ecclesiology, authority, sacraments and ecclesio-political relations, and traces the shape of the charged discussions that orbited around these through the patristic, medieval and Reformation eras. In this, she demonstrates that in many ways the Reformation was in considerable continuity with the periods that preceded it, though the consequential outcome of the debates in the sixteenth century was dramatically different.
