

Better Values. Better Families. Better World.: How instilling the core values of humanity in children will create stronger families, more responsible societies and a saner world

The modern family unit has been affected by the ongoing crisis. Stable marriages are on the decline, as is a sense of community with friends and neighbors. These factors impact our most precious resource - children- as more and more children grow up without a stable household to give them basic guidance, in a society that ridicules old-fashioned values and morality. In this book, Ms.Yi provides fundamental support for parents to educate their children about what is right or wrong, worthy or unworthy, important or unnecessary, in order to provide a basis for sound ethics and judgment in adulthood. Ms.Yi discusses generational changes in family structure, roles, and responsibilities and the ways in which these shifts can affect core values. This Guides thorough and thought-provoking text gives parents and caregivers the opportunity to interact and reflect on fundamental aspects of their role in educating children and preparing them for life, as well as providing tools and a framework of healthy values. Preserving the family unit gives room to social improvement. The main purpose of Ms. Yi?s Guide is setting a new path for the generations to follow.
