

## BJJ Techniques to Defeat Bigger and Stronger Opponents

In your journey as a BJJ fighter, you will no doubt come across larger and stronger opponents and this book is the perfect bible that enables you to topple them - BJJ Today Website Are you being dominated on the mat by opponents that are bigger in size even though you have superior technique? Or perhaps you are being manhandled by stronger guys especially when they pin you in side control or mount and you cant find a way to get out from underneath? If these situations sound familiar, this book is for you. This book is actually a Brazilian Jiu Jitsu (BJJ) program that has been specifically designed for practitioners to learn how to defeat bigger and stronger opponents. When you take the course, you will discover: 1. The concepts, philosophies and the right mindset that will allow you to succeed against the big boys. 2. Revolutionary techniques that are designed for the smaller fighter. Technical escapes and sweeps that will allow you to turn the tables on opponents that have their weight pinned on you. Slick passes that will put you in superior positions to attack and therefore putting your opponents in full defensive mode. High percentage and efficient submissions that will finally enable you to tap bigger and stronger guys. 3. The secret sauce of Pan American Champion Dan Faggella. Lets face it: its no fun to be rag dolled on the mat by strong athletic opponents especially when you know that they are less skilled than you. And in many cases, not knowing how to hold your own against them actually prevents you from being promoted by your professor as well. After implementing the teaching in this book, you wont dread having to roll with the big boys or feel hopeless when they pin you down. Instead when you next see a much larger opponent you will think how interesting. So now is the time to take your Jiu Jitsu to the next level. BJJ Techniques to Defeat Bigger and Stronger Opponents was written with

practitioners just like you in mind. It details concepts, step by step instructions, and literally hundreds of colored photos that will elevate your technique to the next level. This book pretty much lays out a perfect game plan for smaller sized BJJ practitioners - Josh Leduc (Cofounder of Dissension MMA) So stop being dominated by the big guys. Buy this book and start training to become a Giant Killer!
