

Introduction This book is designed to help you prepare yourself to face the real, everyday risks to your financial and mental survival. It is not alarmist but it accepts that there are realities of working life that have to be faced. If you have evaluated the risks carefully and planned their mitigation sensibly, you will Cope With Redundancy. Coping vs. Surviving Coping is not the same as Surviving. You face a multitude of threats from unlikely sources that will not destroy your health or harm your bank balance. They will however sow the seeds of doubt, delay your return to work (if that's your aim) and encourage procrastination- if you let them. Age is not the biggest barrier to achieving your life ambitions although more emphasis is put on it in the popular press than any other reason. The SCARF Factor Find out how to use the SCARF factor to Cope with Redundancy.
