

What do Barack Obama, John McCain, Hillary Clinton, Harry Reid, Nancy Pelosi, Mitch McConnell, John Kerry and Mitt Romney have in common? You might say that the list contains both Democrats and Republicans; however, all are members of a one-party system, we call the political establishment, according to Robert Meyer. And all of them would be extremely displeased if you found out their social and economic policies were based on illusions—destructive illusions. Members of this elite group of liberty violators espouse the same political platform: government interventions on the market place, violations of personal liberty and economic freedom, redistribution of wealth, and policies that cause unemployment. The only differences lie in the degree and method each one advocates. Even worse, the political establishment has teamed up with the financial establishment in order to extract the wealth of productive citizens. According to Meyer, their main purpose is to transfer wealth from the average American citizen to members of the political and financial establishment. Members of this elite group of plunderers consider you and I “Milk Cows”—to be milked dry at their convenience. First, he conquers 7 destructive economic illusions, from the myth that the government creates wealth, to the belief that government interventionism improves the marketplace, all the way to claims that the government creates free enterprise jobs. He also demonstrates how the Federal Reserve System causes the boom and bust cycles that end up in recessions and depressions. Its monetary policies make sure wealth travels Main Street to Wall Street. He continually shows how members of the political and financial establishment violate Natural and Economic Law, much to the detriment of hard-working people. They live by one motto “You must be kept dumb.” Of course, you and I are much more intelligent than these purveyors of human misery give us credit for. . In Part 2, he conquers some more illusions and supplies you 3 possible methods for Restoring the American Dream. In addition, he exposes the myth that the “Government ought to something.” When the legislature is in session, professional politicians work overtime to steal your life, liberty and property. What’s nice about this book is you don’t have to read thousands of pages of economics to discover sound economic reasoning. The author did the legwork for you. There will never be a better time than now to take action to protect your wealth—and your personal liberty and economic freedom.
