

Little Boy Blue and the Man in the Moon

The bond between father and son can be strong, strained, but no matter what, it is still there. Never does that bond become more noticeable than when the father becomes ill with something they will never survive. This is the tale of a man who lived for several years estranged from his father, until news came that the man who raised him had very little time left. It was suddenly time to forgive and forget, it was time to be by his fathers side.
