

Young Christians Finding Truth: Reconciling the Bible & Science

Reconciling Gods written Word and scientific facts concerning the creation of both the world and the creation of man is accomplished in magnificent fashion in Young Christians Finding Truth. This book is recommended for younger Christians who have a desire to know the truth about creation. Because our subconscious minds become very protective of beliefs we already hold, Christians over the age of 23 will probably have a harder time receiving the deeper understandings revealed in author Daniel R. Williamsons latest book. God is not a liar nor is he a deceiver; therefore, because His spoken Word created all scientific facts, His written Word cannot disagree with scientific facts concerning creation. Daniel reveals hidden biblical knowledge that makes it totally unnecessary to choose between the truthfulness of the Bible and the accuracy of scientific facts concerning creation. Young Christians Finding Truth is a one-of-a-kind book and a must read for Bible-believing Christians who also believe in science
