

Planet X: The Coming of the Guardians

WILL THE GUARDIANS SAVE OUR CIVILIZATION AS PLANET X APPROACHES? As an unknown foreign body -- massive in size gets ready to approach Earth (or even strike it!), there has been an unprecedented rise in UFO activity worldwide. Recently, the pilot of a commercial plane had a near collision with a huge UFO over Turkey. But, it turned out the UFO had plans all its own: it didnt hit the plane, but instead attacked and blew up several very large meteorites as they entered the Earths atmosphere. Its entirely possible this debris would have caused considerable damage if the UFO had missed its designated target and the space junk struck a nearby town. A new work by Commander X, **PLANET X AND THE COMING OF THE GUARDIANS** asks numerous questions: O Will UFOonauts known as the Guardians -- or the Niphilim in ancient texts -- avert a global disaster and save us from Planet X at the last moment? O What is the actual evidence that Planet X really exists? O Is there a connection between the approach of Planet X and the mysterious death of several scientists and astronomers known to be investigating the forthcoming holocaust? O There there certain signs in the heavens we can look for the tell when Planet X is due to pass us by -- OR COLLIDE WITH EARTH? This work is for everyone who wants to know the truth about this global disaster that could be far worse than any terrorist attack.
