

Connecting Central Asia with Economic Centers

This is the final report of the Asian Development Bank Institute study Connecting Central Asia with Economic Centers. The study focuses on the five Central Asian economies: Kazakhstan, the Kyrgyz Republic, Tajikistan, Turkmenistan, and Uzbekistan. The aim of the study is to examine the pattern of economic relations between these economies and major economic centers since Central Asia began its transition to a market economy in the early 1990s, highlighting emerging challenges and exploring their policy implications along the way. The report considers trade ties, foreign direct investment and financial flows, migration and remittances, and institutional cooperation between the Central Asian economies and major economic centers such as those in Asia, the European Union, the Russian Federation, and the United States.
