

This book is an illustrated version of the original Hand-Book of Practical Cookery for Ladies and Professional Cooks by Pierre Blot. "Food is the most important of our wants; we cannot exist without it. The man who does not use his brain to select and prepare his food, is not above the brutes that take it in its raw state. It is to the physique what education is to the mind, coarse or refined. Good and well-prepared food beautifies the physique the same as a good and well-directed education beautifies the mind. A cook-book is like a book on chemistry, it cannot be used to any advantage if theory is not blended with practice. It must also be written according to the natural products and climate of the country in which it is to be used, and with a perfect knowledge of the properties of the different articles of food and condiments."
