

Think. Again!: Because the world needs more people who think

450+ pages. 150+ essays. To reinvent yourself. Your life. And the way you see the world.

New Years resolutions never work. Trying to get rid of bad habits never really works. Trying to change who you are never really works. Because were doing it all wrong. We want to instantly change all of these things. But the only way to change anything in our lives is to change our mindsets first. If you dont change your mindset youll still do the exact same things over and over and over again. Youll still be the exact same person youve been before. Change never happens outside in. It only works inside out. So whenever you want to change something in your life, whenever you want to change a certain behavior (or your entire life) you need to change your mindset first. And once youve taken that step, once youve changed your mindset, youll be able to achieve so much more. Youll be able to get rid of your bad habits. Youll be able to start writing that book. That blog. Or start that company. Or tell her about your feelings. Become a better friend. The past few years have been transformative for me. Especially last year. And I never had any New Years resolutions. All I did was to think. A lot. And read. And share my thoughts and lessons learned with other people. Online. And offline. And on my blog. So I took the leap and put all of my thoughts, emotions and lessons learned from the past year and put them into one book. A life changing book. A transformative book. So whenever you feel stuck, whenever you feel like you want to get rid of a bad habit, whenever you want to change your life, whenever you want to become a better person, start that business, write that book, start your own charity or whatever, this is the book to read. This is it..
