

## Discovery WORKBOOK: Why Didnt I Think of That

This workbook is an opportunity for you to learn what you want at your own pace. Its purpose is to help you discover and believe that, Every problem has a solution. John W. Gardner has the right idea, He said, The ultimate goal of the educational system is to shift to the individual the burden of pursuing his own education. We learn to cook by cooking, sing by singing, paint by painting; so life can become doing what we are good at, and what we enjoy. H.G. Wells said, Our educational system seems to have developed a community of faith and obedience. It should be replaced with knowledge and the will to make a difference. This workbook suggests that you focus on powerful words that improve your social and communication skills. You will find when you pick, choose and design, at least part of your education you will begin to believe, I can do anything I set my mind to. I believe you are capable of learning more than you realize, and at a speed that will surprise you. Practice with these education tools will give you: I can do this attitude.
