

Many people set out to achieve a dream-starting a business or learning to play the piano or publishing a book-but they dont succeed, and the dream fizzles away. In many cases, these people have lots of skills and expertise, such as deep knowledge of the business or career they are interested in, so why dont they succeed? Paul Levesque and Art McNeil have discovered that making a dream come true requires cultivating skills of a higher order-macroskills-that inevitably spell the difference between success and failure no matter what the specifics of a persons dreams are. These are the skills Dreamcrafting outlines in detail.
