

Earth Under Fire: Humanity's Survival of the Apocalypse

Ancient myth and esoteric lore from around the world tell frightening tales of humanity suffering through destruction by fire and flood, legends of catastrophe so extreme and so pervasive that now we tend to discount them as imaginative exaggerations. Paul LaViolette thought so too, until he discovered an ancient time-capsule cryptogram written in the constellations that related the galactic cause of these events. In this book he explains how this scientifically advanced message combines with ancient esoteric lore to alert us to a cyclical cosmic disaster -- one that could recur today virtually without warning. In this book, Dr LaViolette elegantly weaves sobering accounts from ancient legends together with recent scientific data to reconstruct the details of a tragedy that plagued mankind for endless generations with periods of persistent darkness, frigid cold, searing heat, and mountainous floods, from which only a few survived. Unravel the mysterious riddle of the Sphinx; Learn the memorial significance of the Orion constellation, the Pleiadian rites, and the Minoan bull-leaping ceremony; Understand what caused the mammoths to suddenly die and freeze in the Arctic and what caused the extinction of the ice age mammals. Discover the relevance of the tragic dates encoded into the Giza Pyramid complex and the Temple of Dendera. Decipher the Galactic zodiac of the South American Barasana. Find out what Plato's allegorical story of Atlantis and the Flood was really trying to convey. Earth Under Fire demonstrates how ancient myths and lores have preserved an accurate record of a missing era in human history, knowledge of which may be crucial for our own future survival.
