

Sandra Schneiders commands respect as one of the most significant and influential figures in the emergence of the study of Christian spirituality as an academic discipline, as the focused and disciplined exploration of religious experience. This book honors her contributions to the field by addressing issues that are emerging at the creative edges of the discipline. In this volume, colleagues and students of Dr. Schneiders and other collaborators in the academic discipline of Christian spirituality examine crucial issues from their various disciplinary and methodological perspectives. Questions of methodology address the status of spirituality as a discipline, interdisciplinarity, and self-implication. Other essays explore the edges of Christian spirituality and biblical spirituality, gender studies, the natural sciences, nature writing, the social sciences, and interfaith issues. This collection of essays will provoke students and scholars of Christian spirituality, as well as practitioners, to continue critically thinking, discussing, writing, and practicing it.
