

This book spells out my life experience in the East and the West. I selected the most meaningful and significant events that I encountered. I then gave the detailed cultural comparisons from my professional background as a counseling psychologist. A total of 44 articles covered five major areas: life, race, society, sexuality, and self. In a sense, you get to see all issues in life from the huge universe down to the our tiny self. I am sure you will be able to have a better understanding of yourself and the world around you. Upon reading this book, I hope you will be able to apply what you read to your daily life. In this global village of ours, lets work toward a new and better world culture.
