

## Macroeconomics: A European Text

Building upon the success of previous editions, *Macroeconomics 3/e* provides a comprehensive analysis of modern macroeconomics within a global context. Competing theoretical approaches are presented in a clear and balanced manner with continual reference to data and case study examples from the real world. The excellent teaching and learning aids include chapter overviews, summaries of key concepts, end of chapter exercises, and suggestions for further reading for each chapter. Completely revised and updated, this new edition contains new material on economic growth, labour markets and unemployment, money supply, inflation, financial and exchange markets, and supply side policies.
