

## The Confessions of Saint Augustine (a Vero House Abridged Classic)

He was born Aurelius Augustinus in the year 354, and eventually became bishop of Hippo Regius, in northern Africa, and a Doctor of the Church. Since then, reviews of St. Augustines writings regularly spark controversy. But he remains immensely influential, making major contributions to both Western Christianity and philosophy. Yet, his Confessions are more than another treatise on theology. In this autobiographical work, we see the drama of human spiritual development, from the foolish decadence of youth, to the wisdom that results from a persistent focus on Truth. We learn also that a saintly mothers prayers matter in guiding a wayward sons footing on the slippery path to heaven. For this reason, the books of Augustines Confessions are among the most popular writings from this prolific saint. Even in modern times, Augustines words remain a powerful force in philosophy and theology. More than that, however, his autobiographical Confessions provide hope for every Prodigal Son. This minimally abridged translation has been edited for modern English, making this classic a treasure that anyone can and should appreciate.
