

# Fantastic Adventures in Metaphysics: An Extraordinary Journey into the Nature of Reality

This book explores the secret teachings of all the great philosophers and spiritual geniuses of our time and reveals the common theme throughout all of them. According to the esoteric schools of advanced knowledge, certain divinely inspired teachers brought spiritual, philosophical, and scientific knowledge to the human race following a global cataclysm. This planet has a history of unexplained phenomena that still baffles scientists today. There have been structures built all over the world that are simply out of place and out of time. Have humans been on the scene much longer than we previously thought? Did they leave us clues in writing, sacred geometry, and architecture about who they were and where they came from? Do these clues reveal the truth about who we really are?
