

The roles of men and women, for a long time, were strictly defined under the assumption that societies run much more efficiently that way. Women make babies, and it only made sense that they provide care for them. This required that they stay home and dedicate their lives to ensuring the survival of their young. And since that didn't require much effort, reasoned the men, then it only seemed logical that the women also ensure that the household run smoothly and efficiently. The man's role was to toil in the fields and bring home the bacon so that his woman could cook it and he could eat it. Unfortunately, this system required the dependency of women on men to provide food and other such resources for her and her offspring. Generations passed, and after a while it became evident that the system was flawed. Not all men who impregnated women then stayed around to support and protect women and their offspring. Some of them became bored with the humdrum task of working to support the wives who spoon-fed them and the children they sired. They abandoned the family unit to seek the company of women who were unburdened and, therefore, interesting and exciting. Some men impregnated women outside of marriage and decided not to stick around and provide resources at all, leaving those women to care for the child all on their own, because very few men were willing to take over and foot the bill for someone else's child. Some men drove themselves and women into poverty because they impregnated too many women, and there weren't enough resources to go around. In the wake of all of the poor choices that these men made, some children were abandoned, others aborted, but most all of them were destined for a life of poverty. Those who stuck around didn't help matters much. The men were often tyrannical rulers; subjecting women to abuse, infidelity, and objectivity. Women were property to acquire and own. Women were useful as entertainment and pleasure devices, and when they had outlived their usefulness, they were cast aside. Women grew tired of being told that they weren't as strong or smart as men. They became less tolerant of the abuse to which men subjected them. They were fed up with the degrading boxes men put them in. After years of enduring this slave labor system, women began to wonder if it would be possible to share the roles of men or even reverse them. Enter the Women's Liberation Movement. *People Are From Earth* is a non-fiction work detailing the struggles of women in the aftermath of the women's movement. Modern women have the right to vote, pursue higher education, and enter the workforce, but such rights have come at a price. Many men are still not willing to relinquish equal status and power, and their attitudes toward women have been modified to include attacks on their individuality, sexuality, and contributions. The efforts of women to decrease their dependence on men are met with psychological warfare. Seven of the most common enemies of women's rights--psychology and science, organized religion, the media, the word feminist, the government, men, and other women--are explored in detail, giving women the insight they need to overcome these obstacles and achieve their goals. Men are encouraged to see the issue from a different perspective; one of understanding for the plight of the women in their lives. Parents are encouraged to see the dangers that lie hidden in perpetuating the roles that are forced on their children by today's society. The descriptions of a move toward more balanced roles between men and women helps readers recognize the many benefits of eliminating attitudes and behaviors that cause gender discrimination.
