

This excellent anthology in the philosophy of religion examines the basic classical and a host of contemporary issues in thirteen thematic sections. Assuming little or no familiarity with the religious concepts it addresses, it provides a well-balanced and accessible approach to the field. The articles cover the standard topics in the field, including religious experience, theistic arguments, the problem of evil, and miracles, as well as topics that have gained the attention of philosophers of religion in the last fifteen years, such as reformed epistemology, the philosophical analysis of theological doctrine, and the kalam theological argument. The collection also includes topics often requested by instructors but seldom covered in competing texts, such as religion and science, religious pluralism, process theism, and religious ethics, offering greater flexibility in choosing exact topics for use in courses. The format of the book makes it an ideal teaching text, as each section begins with a brief introduction to the central topic or issue treated by the readings which follow. Each reading is preceded by a one paragraph summary, and a bibliography of suggested readings follow each section. Philosophy of Religion functions well as a stand-alone textbook for courses in the philosophy of religion, and is readily compatible for use as a primary source reader in conjunction with a secondary text. It is an ideal companion to Reason and Religious Belief, 2e (OUP, 1997).
