

This book combines practical guidance and theoretical background for analysts using empirical techniques in competition and antitrust investigations. Peter Davis and Eliana Garces show how to integrate empirical methods, economic theory, and broad evidence about industry in order to provide high-quality, robust empirical work that is tailored to the nature and quality of data available and that can withstand expert and judicial scrutiny. Davis and Garces describe the toolbox of empirical techniques currently available, explain how to establish the weight of pieces of empirical work, and make some new theoretical contributions. The book consistently evaluates empirical techniques in light of the challenge faced by competition analysts and academics--to provide evidence that can stand up to the review of experts and judges. The book's integrated approach will help analysts clarify the assumptions underlying pieces of empirical work, evaluate those assumptions in light of industry knowledge, and guide future work aimed at understanding whether the assumptions are valid. Throughout, Davis and Garces work to expand the common ground between practitioners and academics.

Bits of Wisdom (Lightworkers Log), The Case for an International Banking Standard (Policy Analyses in International Economics), Dear God: Why am I here?, The Study of Religions: -1914, Quick and Tasty Christmas Gifts (Memories in the Making Series), 10 Steps to Getting Discovered on LinkedIn, Dogs Bullets & Carnage, Tome 3 (French Edition), Golf and the Art of War: How the Timeless Strategies of Sun-Tzu Can Transform Your Game,
