

Sacred Scripture Secular Science: A Commentary

In my opinion there is much available today in more open scientific circles that fulfill the statement by President Smith that time will level all things. In recent years, while we moved from the twentieth century and into the twenty first century, there have been a good number of scholarly works that have come to bear on these controversial subjects. What follows is a treatise that is intended to demonstrate what the Lord has revealed in his sacred scriptures and how it correlates with or opposes secular scientific theory and philosophy. I will first relate what the Lord has revealed to us through his sacred scriptures. Then, I will review the scientific presentations of recent date that show that time has moved towards a leveling of all things and that there need not be vain attempts made to stretch the word of the Lord in order to have it conform to false scientific theories and philosophy. The sacred scriptures are true! If you find anything or things in this treatise that dont square with the revelations and truths of the Lord, feel free to disregard them. But of course, I hope that you will give the entire treatise a chance before any premature judgments. Although most of what I have included in this treatise is supported by extensive scriptures and by scientific observations, there are a few theories that you might find new and innovative. I appreciate your time and attention.
