

Speculative Theology and Common-Sense Religion: Mercersburg and the Conservative Roots of American Religion (Princeton Theological Monograph Series Book 92)

Evangelicals in nineteenth-century America had a headquarters at Princeton. Charles Hodge never expected that a former student of Princeton and his own replacement during his hiatus in Europe, John W. Nevin, would lead the German Reformed Church's seminary in a new, and in his mind, destructive direction. The two, along with their institutions, would clash over philosophy and religion, producing some of the best historical theology ever written in the United States. The clash was broad, influencing everything from hermeneutics to liturgy, but at its core was the philosophical antagonism of Princeton's Scottish common-sense perspective and the German speculative method employed by Mercersburg. Both Princeton and Mercersburg were the cautious and critical beneficiaries of a century of European Protestant science, philosophy, and theology, and they were intent on adapting that legacy to the American religious context. For Princeton, much of the new European thought was suspect. In contrast, Mercersburg embraced a great deal of what the Continent offered. Princeton followed a conservative path, never straying far from the foundation established by Locke. They enshrined an evangelical perspective that would become a bedrock for conservative Protestants to this day. In contrast, Nevin and the Mercersburg school were swayed by the advances in theological science made by Germany's mediating school of theology. They embraced a churchy idealism called evangelical catholicism and emphatically warned that the direction of Princeton and with it Protestant American religion and politics, would grow increasingly subjective, thus divided and absorbed with individual salvation. They cautioned against the spirit of the growing evangelical bias toward personal religion as it led to sectarian disunity and they warned evangelicals not to confuse numerical success with spiritual success. In

contrast, Princeton was alarmed at the direction of European philosophy and theology and they resisted Mercersburg with what today continues to be the fundamental teachings of evangelical theology. Princetons appeal was in its common-sense philosophical moorings, which drew rapidly industrializing America into its arms. Mercersburg countered with a philosophically defended, churchly idealism based on a speculative philosophy that effectively critiqued what many to this day find divisive and dangerous about Americas current Religious Right. Linden DeBie is a good guide through the landscapes of nineteenth-century philosophy, rationalist to romantic. Better yet, he shows how the high Christology and ecclesiology of the Mercersburg movement--in contest with critiques from Hodge to the pietists--was able to relate, but not capitulate, to the organic and dialectical themes it drew from Hegelian thought. --Gabriel Frackre Author of the Christian Story systematic series, whose most recent volume is The Church: Signs of the Spirit and Signs of the Times (2007) Linden J. DeBie received his doctorate in religious studies at McGill University and has taught at Seton Hall and New Brunswick Theological Seminary. He is currently working on his new book Coena Mystica, a study of the monumental, literary Eucharistic debate between Charles Hodge and John W. Nevin.
