

Testing Scripture: A Scientist Explores the Bible

Scientist and theologian John Polkinghorne is one of the world's leading authorities on issues of science and faith. In this compelling work, he provides a fresh, honest look at key themes of the Bible from an analytical and rational perspective, offering a series of insights that have helped him in his own engagement with the Bible. Polkinghorne tackles the questions a modern Western thinker might bring to the Bible, including issues of Scripture and authority, contradiction and ambiguity, and the creation and fall. He also addresses theological challenges of the Old Testament, the Gospels, and the writings of Paul. I have written this little book in the hope that it will be helpful to those who are seeking a careful and thoughtful engagement with the Bible in their quest for a truthful understanding of the ways of God and the nature of spiritual reality, writes Polkinghorne. His nuanced approach will be appreciated by any reader with an open and inquiring mind who is interested in the intersection between science and Scripture.
