

## The China Boom and its Discontents

China is shaping the global economy as never before. An insatiable demand for commodities, energy resources and capital, and deepening integration to the world economy has won China acclaim. Yet 25 years of rapid industrial development, far-reaching economic reforms and increasing international competition have also created an array of challenging domestic policy demands. The China Boom and its Discontents discusses the financial and social challenges that have emerged in the wake of rapid economic growth. Recent research on demographic trends, labour movements, financial development, social security, urbanisation and trade agreements highlight the unfinished progress of reforms in China.
