

The Bible, The Quran and Science.

In this objective study of the texts, Maurice Bucaille clears away many preconceived ideas about the Old Testament, the Gospel and the Quran. He tries in this collection of Writings to separate what belongs to Revelation from what is the product of error or human interpretation. His study sheds new light on the Holy Scriptures. At the end of the gripping account, he places the believer before a point of cardinal importance: the continuity of the revelation emanating from the same God, with modes of expression that differ in the course of time.
