

## The Individuation of God: Integrating Science and Religion

Peter Todd argues for the integration of science and religion to form a new paradigm for the third millennium. He counters both the arguments made by fundamentalist Christians against science and the rejection of religion by the New Atheists, in particular Richard Dawkins and his followers. Drawing on the work of scientists, psychologists, philosophers, and theologians, Todd challenges the materialistic reductionism of our age and offers an alternative grounded in the visionary work taking place in a wide array of disciplines. Peter B. Todd has been a research psychologist at the Neuropsychiatric Institute Sydney, a member of the Biopsychosocial AIDS Project at the University of California, a consultant in the department of immunology at St. Vincents Hospital, and a research coordinator at the Albion Street AIDS Clinic Sydney. His papers have appeared in the British Journal of Medical Psychology, the Griffith Review, and the interdisciplinary journal Mind and Matter. He is currently a psychoanalytic psychologist in private practice in Sydney, Australia.
