

# The Psychology of Success

How do people who have nothing manage to achieve success in life? What kind of mindset does it take to get ahead in life? What makes some people do well in life where others fail or just get by? This book examines traits successful people share among themselves that have been instrumental in their success, characteristics without which they would not be where they are today. Not only does the book explore common factors of success in people who have achieved success, it articulates, in a very straightforward manner, how a person can cultivate those factors in himself or herself to become successful.
