

How was the universe created, and why? What is the role of man on Earth, and that of intelligent beings on other planets, in it? What is life like on some other planets? Why is man here, what is expected of him? These are some of the questions that this book answers. The translator considers the material in this book as religion and philosophy of life for people who are searching for the full truth and are willing to think for themselves and to question commonly accepted beliefs. The book has two parts, the first explains, clarifies, and in a few cases supplements the concepts, which the Prophets of the past, such as Buddha, Christ, Indra, Mohammed, Moses, Zoroaster, and others proclaimed. The second part tells what the Prophets of the past could not tell back then, because the humanity of that time would not have understood them.
