

Danger in the Camp

Danger in the Camp: An analysis and refutation of the heresies of the Federal Vision is a defense of the great doctrinal truths of the Protestant Reformation. The Federal Vision movement has denied justification by faith alone, the perseverance of the saints and the imputation of Christ's righteousness, to name a few. This book defends the theology of the Reformed standards set forth in the Westminster Confession of Faith and Catechism, the Belgic Confession and Heidelberg Catechism, and the Canons of Dordt. This is the most comprehensive analysis to date. The book uses the very words of the proponents of the Federal Vision movement to provide precise documentation and analysis.
