

Exploring Your God-Given Talents: ...discover, develop, deploy, dedicate

Excerpts from the book So long we could all carry out different activities in our surroundings, then it means that we all have different abilities inside of us. And I said that the reason why every one of us is endowed with various good abilities is because, God- The Creator of everything, created us perfectly and pleasantly. That means, we are wonderfully made, and are wonderful in His sight. And that is why the Bible said: And God saw everything that he had made, and behold, it was very good (Gen. 1:31 KJV) In sport, for instance, different variation of attention is given to different forms of sport in different places. In some societies, football tends to have a huge edge over other sports. The amount of attention being given to football as a sport is different from the ones given to other sports. And what it implied is that, in such places, the attention that would be given to sport persons varies. That is, in such places where football as a sport is given more importance than others, a footballer in such places is more likely to be honored and respected than another sport person who participates in other sports. About The Book Every one of us has inside of us, many different abilities, attributes, and potentials. Yes, God has given them to us in full measures. And then, among the many activities which an individual could carry out, there are some certain ones which are special (that is, could be easily done or carried out). Such ones are ones which many others around could find extremely difficult to do, or cant even do at all. These special abilities are known to be our talents. That is to say, since our Loving God deposited numerous attributes, potentials, and abilities inside of us, then there are also certain ones among them which are our Talents, and which we should take seriously. This book talks about talent and it utilization in a unique way. Here, you will learn about the topic of talents and it utilization, from a unique

perspective that will give you a unique knowledge of this important subject.
