

## God in Two Minutes

Is God a Myth? Like several myths of the pre-science and pre-mathematics era, is god a myth of the pre-Mentomatics age? As Mathematics explained the laws of the external physical world, will a new science called Mentomatics explain the laws of an internal world of our mind and brain? Like mathematics became the language of the physical science, will Mentomatics be the language of Spiritual science? After the industrial and information revolution, will Mentomatics usher in the spiritual revolution? Will we, the believers of god, then look as foolish as the people who believed that the earth was flat? And that you could fall off the edge of the earth into hell? God in Two Minutes by Prem Kamble dwells on several such questions. It looks at the past and possible future of God and Religion as has never been done before. It is based on completely original thoughts, not based on anything you have read or heard anywhere before. Though consistent with most religions, it challenges some of our basic beliefs. When our strong beliefs like the flat-earth theory have been proved wrong, it is possible that some of our deepest faiths today may prove to be myths.
