

We Are the Children of the Stars: The Classic that Changed the Way We Look at Aliens

This groundbreaking book from the early 1970s presents scientific evidence to prove that mankind could not have possibly evolved naturally. Binder and Flindt explore the very real possibility that we are direct descendants of ancient starmen who came from other planets to Earth millions of years ago. We Are the Children of the Stars reveals: Earth has been visited more than 5,000 times by creatures from other planets! Evidence that starmen deliberately hid any Missing Link human fossils in order to keep mankind from knowing it was a colony! Evidence that the starmen were the Angels of the Bible, carrying on a Divine mission to bring human life to Earth! Space researcher Max H. Flindt was the first to scientifically document, from biological evidence, the possibility that mankind may be a hybrid from a prehistoric union of terrestrial humanoids and starmen.
