

What Happens When Your Loved One Dies: A Study of the Spiritual Realm

The loss of a loved one is never an easy experience for any human being to fully digest. Its lasting devastating effect on your emotional, mental, spiritual and physical existence is life changing within itself. With time, some people learn to deal with the loss of a loved one much better, but nothing can possibly replace the enormous void in your mind and heart that's generated after your loved one has transcended into the after-life. From my very own personal experiences, the recent loss of both my mother and grandmother, I'm sharing with you, in full detail; not only what happens during the end-of-life stages, but also what happens after your loved one dies and their Spirit leaves their body. If you're grieving over someone who may have died that was near and dear to your heart, this book will not only educate you about the after-life, it will also make you aware that even though the soul sleeps until Christ returns, your loved one's spirit is still alive and active. Also, I'm sharing with you multiple ways in which these drastic circumstances can affect children of all age groups, how to deal with each age group accordingly, how cats and other animals can sense spirits and/or illnesses within their owner, my personal experiences with different medical systems/hospice services, as well as information about what takes place in the Spiritual Realm, how we actually visit this world while we're sleeping and so much more. Documenting my pain, personal experiences and in-depth studies within this book was designed as a platform that enables me to reach out to anyone who's mourning and grieving the loss of a loved one. You're not alone and, I hope you find the information that's provided in this book to be very comforting, educational and reassuring to you.
