

Why I Believe in the God of the Bible

Do religion and science have to be separated? Can we really understand the origin and workings of the universe without studying the Bible, and accepting God's existence? Brett Rutherford provides evidence from physics, biology and astronomy that points to a supernatural origin for the universe. He also examines the text of the Bible in light of evidence from science, history and archaeology to determine if the Bible could have come from the Supernatural Force who created the universe. Why I Believe in the God of the Bible is a thirteen chapter book with review questions at the end of each chapter - ideal for Bible classes.
