

## The Hot Springs Trail: Official Map Set

The Hot Springs Trail Official Map Set: The Hot Springs Trail is an original 2,370-mile backpacking route that connects sacred places with healing waters. This incredible thru-hikers journey begins from the Pacific Ocean in the paradise town of Santa Barbara, California and visits more than 80 wild or resort hot spring areas before reaching Canada. The Hot Springs Trail contains 4 smaller parts, each of which is its own epic adventure with its own guidebook. The Hot Springs Trail Official Map Set provides you with a full set of custom maps for the entire trail but without the written on-trail support. This map set has been published to be used as a companion set for traveling partners or support team members and should only be used as a stand-alone by seasoned thru-hikers. This guidebook still addresses safety concerns, offers first-hand advice and tips, gives a complete breakdown of all resupply options, highlights water alerts, and includes websites for planning. The Hot Springs Trail is friendly enough for newcomers to hiking, backpacking, or thru-hiking and rewarding enough for long-trail veterans, adventurous explorers, and aspiring thru-soakers. The Hot Springs Trail was pioneered solely by Aria Zoner and first successfully thru-soaked in 2014. This monumental guidebook has also been published to be used as a template for an official Hot Springs National Scenic Trail.
